

JONATHAN CORPUS

ELECTRONICS ENGINEER | SOFTWARE & SYSTEMS DEVELOPMENT

+ 52 8118890377 | Jonathan.ecorpus@gmail.com | Video Introduction | Portfolio

ABOUT ME

Electronics and Automation Engineer with experience in 24/7 industrial systems (SCADA, PLC, HMI), ERP integration via APIs, web and mobile apps in .NET and JavaScript, and EEG/EMG signal acquisition. Focused on continuing to grow and adding value through engineering solutions.

PROFESSIONAL EXPERIENCE

Supralux (Supra Desarrollos Tecnológicos) **Apr 2026 – Present**

ERP Finance Analyst - *Finance department - Monterrey, N.L*

- Integrated NetSuite (RESTlets, SuiteQL, OAuth 1.0) and replaced an external provider, saving ~MXN 720K/year.
- Built dashboards and web apps on top of the ERP with Google Apps Script and JavaScript, with no BI licenses.
- Automated daily sales and order reports for the Board of Directors and Sales Management.
- In development: LumenPlot (lighting on Google Maps) and Integra (HR platform), in Node.js.
- NetSuite (CRM and ERP) user, role, and permission management, and training of new staff.

Autotransportes Especializados Alfa **Dec 2025 – Mar 2026**

Full Stack Developer - *Project: QR mobile payment app - General Escobedo, N.L*

- Designed the architecture of the cafeteria payment system using the badge QR, replacing a handwritten log.
- Developed the mobile app in .NET MAUI and its REST APIs in .NET and SQL Server.
- Implemented the payment monitoring web platform for Payroll in ASP.NET MVC.

KIA México **Jun 2024 – Jun 2025**

Systems Developer & Administrator - *Maintenance department - Pesquería, N.L*

- Administered the alarm SCADA for the Kawasaki welding robots (.NET, SQL Server) in 24/7 operation.
- Restored the brake fluid filling machine: traced the fault from PLC and HMI to saturated logs in SQL Server.
- Improved the Maintenance module of QBAMS, Hyundai's ERP across 4 plants, and resolved 200+ incidents.
- Developed web apps in .NET and Azure, such as the staff transport incident report for General Affairs.
- Implemented Breakdown and Downtime KPI dashboards by equipment (SQL Server, stored procedures, Power BI).
- Supported the SAP Fiori migration as liaison with Hyundai: trained users and set up tablets and Zebra printers.

Hospital Universitario UANL **Dec 2023 – Jun 2024**

Systems Developer - *Neurology department - Monterrey, N.L*

- Collaborated on a brain-computer interface (BCI) for rehabilitation after stroke.
- Acquired 300+ EEG and EMG signal samples to train a random forest model.
- Developed C# apps to guide motor tasks and measure sustained attention.

EDUCATION

B.Sc. in Electronics and Automation Engineering

FIME – Universidad Autónoma de Nuevo León (UANL)

Jan 2020 - Jun 2025

SKILLS

Technical Skills

- C#, .NET Framework / .NET (4.8 – 10.0), .NET MAUI, ASP.NET MVC, C/C++, STM32, PLC & Modbus, JavaScript, Node.js, React, REST APIs, SQL Server, MySQL, SQLite, Azure, NetSuite (SuiteQL, RESTlets), Google Apps Script, Power BI, Advanced Excel, MATLAB, R, AutoCAD, Blender, Unity 3D, Git, SVN, Postman

Soft Skills

- Problem solving, Analytical thinking, Cross-functional communication, Fast learning, Technical initiative, Technical documentation, User training, Working with international teams

LANGUAGES

- Spanish: Native
- English: Advanced
- German: Basic
