[Video Introduction](#)

General Escobedo, N.L

ABOUT ME

Electronics and Automation Engineer and Software Developer with experience in C# and .NET, developing web, mobile, and desktop applications, as well as integrating SQL databases. I have contributed to the development of enterprise systems, data analysis platforms, and monitoring tools.

PROFESSIONAL EXPERIENCE

Autotransportes Especializados Alfa

Dec 2025 - Current

FullStack Developer- Systems department - General Escobedo, N.L

- Developed data models, stored procedures, and SQL Server pipelines for internal ERP systems.
- Developed web-based business analytics platforms integrated with Power BI for tracking operational KPIs.
- Led the development of a mobile QR payment system and its web monitoring platform for the payroll department.
- Implemented data validation and standardization processes to improve data integrity in ERP systems.
- Developed analytical models for diesel consumption to segment costs by operator, route, and location.

KIA MEXICO (Intern)

Jun 2024 - Jun 2025

Developer & Systems Administrator - Maintenance department - Pesqueria, N.L

- Developed internal web applications to digitize maintenance requests and asset tracking.
- Implemented Power BI dashboards to analyze equipment failures, downtime, and performance.
- Integrated industrial systems using industrial Ethernet, PLCs, and SQL Server for equipment monitoring.
- Participated in the migration of ERP systems from SAP HANA to SAP Fiori to modernize maintenance tools.
- Collaborated with IT, Facilities, and Maintenance teams on technology infrastructure projects within the plant.

HOSPITAL UNIVERSITARIO UANL (Intern)

Dec 2023 - Jun 2024

Systems Developer - Neurology department - Monterrey, N.L

- Developed Windows Forms applications in C# to guide patients through motor tasks and facilitate clinical data acquisition.
- Collaborated in the validation of artificial intelligence models for analyzing motor recovery in stroke patients.
- Participated in the acquisition and processing of biomedical signals (EEG and EMG) used to train and validate predictive algorithms.
- Transformed clinical results into quantifiable metrics to support medical decision-making.
- Documented tools and processes to ensure the reproducibility of research studies.

EDUCATION

B.Sc. in Electronics and Automation Engineering

FIME - Universidad Autónoma de Nuevo León (UANL)

Jan 2020 - Jun 2025

SKILLS

Technical Skills

- C#, .NET Framework / .NET (4.8 - 10.0), .NET MAUI, SQL Server, MySQL, SQLite, Azure SQL Databases, Azure App Services, Power BI, Advanced Excel, JavaScript, Node.js, React, REST APIs, Postman, Git, Stored Procedures, Data Modeling, PLC & Modbus.

Soft Skills

- Problem solving, Analytical thinking, Cross-functional communication, Rapid adaptability, Technical initiative, Process optimization, Technical documentation, Data-driven decision making, Project management and leadership.

LANGUAGES

- English: Advanced
